

Introducing *da Vinci*® Consults, a secure online solution that allows both referring physicians and their patients an easy alternative for requesting a *da Vinci*® procedure consultation from your office.

Security

HIPAA rules advise that the electronic transfer of and access to protected health information be addressed through the use of encryption and authentication. Our online *da Vinci*® consultation request form provides a secure alternative that protects collected health information.

Improved Workflow

Automated, customized message routing directs form results to authorized staff that you determine. Completion of secure online form eases workflow issues in your office.

- Referring physicians and their patients can request and office staff can efficiently process *da Vinci*® consultation requests at a time that is convenient for them.
- Online forms save referring physicians, patients and office staff time.
- Opportunity to collect referral data as well as e-mail addresses for office announcements or communications.

Structured Content

Using our form ensures that you collect all the information you need, in the format that you require. This helps to reduce call backs and make your office operate more efficiently when processing consultation requests.
